

Fertiliser Spreaders

Wagtail (Pendulum) Fertiliser Spreaders

The Fleming Wagtail (Pendulum) Fertiliser Spreaders have been designed for spreading granulated fertiliser. The Wagtail spreader is an extremely versatile machine, suited for use on smaller tractors as well as a cost effective means of spreading large volumes of granulated fertiliser on bigger farms. The Fleming Wagtail spreader comes in 2 main sizes; The FSC500W which can be fitted with an extension up to 600 litres and the FSC800W which can be fitted with extensions up to 1400 litres.

Wagtail model options include:

- FSW500 (500L)
- FSW600 (600L)
- FSW800 (800L)
- FSW1000 (1000L)
- FSW1250 (1250L)
- FSW1400 (1400L)

- Glass Fibre reinforced hopper which does not rust or deteriorate
- Variable Spreading widths from 6m - 12m
- Parts are compatible with other makes of spreaders.
- Optional hydraulic shut off
- Optional dry salt spreader attachment

	Load Capacity	Max Height	Spreading Width	Weight
FSW500	500L	1.000m	6 - 12m	130kg
FSW600	600L	1.035m	6 - 12m	155kg
FSW800	800L	1.070m	6 - 12m	175kg
FSW1000	1000L	1.200m	6 - 12m	178kg
FSW1250	1250L	1.300m	6 - 12m	190kg
FSW1400	1400L	1.350m	6 - 12m	195kg

Fertiliser Spreaders

Single Disc Fertiliser Spreader

The Fleming tractor mounted single disc Fertiliser Spreader (spinner) has been designed as a value for money machine for spreading granulated fertiliser and dried salt. A very versatile unit, well suited for use on smaller tractors for a cost effective means of spreading granulated fertiliser on equestrian and hobby small holdings as well as larger undulating grassland and hill farms. Can be fitted with a salt spreading kit for use in winter for keeping roads, drives, car parks etc clear from frost and snow.

The Fleming single disc spreader come in 2 sizes;

Single Disc Spinner models include:

- 315kg (FS300)
- 450kg (FS500)

- 4 adjustable spreading fins for even distribution of material.
- Spreading disc and fins made from stainless steel for longer life
- Cat. 1 lift arm pins.
- Optional Agitator
- Optional cable control shut off.
- Attachment available for spreading dry salt and sand. (Not suitable for rock salt)
- Optional cover

	Load Capacity	Spreading Width	Height	Weight
FS300	315kg	6m - 10m	1.05m	54kg
FS500	450kg	6m - 10m	1.13m	60kg

Fertiliser Spreaders

Trailed Spreaders

The Fleming trailed single disc Fertiliser Spreader (spinner) is designed for spreading granulated fertiliser and dried salt, for use on small tractors, garden vehicles and other compact machines such as quads which do not have a P.T.O shaft. The movement of the wheels through the gearbox which is fitted on the main axle makes the spreading disc turn. The forward speed of the tractor determines the spreading width.

A very versatile unit, well suited for use on green areas, gardens, equestrian and hobby small holdings. Can be fitted with a salt spreading kit for use in winter for keeping roads, drives, car parks etc clear from frost and snow.

(FSC180T)

- Ideal for sports pitches, gardens, small parks & paddocks.
- 4 adjustable spreading fins for even distribution of material.
- Spreading disc and fins made from stainless steel for longer life
- Direct Drive
- Robust plastic hopper
- 50mm Ball hitch
- Optional Agitator
- Optional cover
- Attachment available for spreading dry salt and sand.
(Not suitable for rock salt)

	Load Capacity	Spreading Width	Weight	Number of Fins
